

## Product Data Sheet

**Style MM32MTS Maxsil-Tex Silica Fabric – Vermiculite Coated**

McAllister Mills, Inc.

**Revised: September 6, 2011**

---

<b>WEIGHT:</b>	33 oz/yd <sup>2</sup> (1100 grams/m <sup>2</sup> )
<b>THICKNESS:</b>	.065"
<b>FIBER:</b>	Amorphous Silica
<b>TREATMENT:</b>	Preshrunk
<b>WEAVE:</b>	Plain
<b>WIDTH:</b>	40"
<b>ROLL LENGTH:</b>	50 yards
<b>SERVICE TEMPERATURE:</b>	2000 F.
<b>SHRINKAGE:</b>	Less than 2%
<b>COATING:</b>	Vermiculite – Natural Color

One of the most durable high temperature fabrics on the market today for resistance to over 2000 F (1100 C). Fabrics are manufactured from continuous filament amorphous silica yarns then texturized to add volume and a proprietary abrasion resistant finish added. Fabrics are heat treated. Applications include Expansion Joints, Heat Shields, Insulation Pads, Oven/Furnace Door Seals, Furnace Curtains, etc. This product is not manufactured from leached fiberglass fabric.
