

Maxsil Silica Tape is a woven product manufactured from texturized amorphous silica filament fiber. The tape has a continuous service temperature of 2000°F and is strong, flexible and has better abrasion resistance than traditional silica fiber tapes. Excellent for furnace door seals, strip curtains, wrapping of hose, electrical cables, pipes, etc.

Weave	Plain
Thickness	0.125" (+/- 10%)
Width	1" – 4" Standard Other widths available upon request (minimums will apply to special widths)
Roll Length	100 feet
Service Temperature	2000°F
Spec for PSA:	
Total Thickness (not including liner):	3.2mil
Adhesive Thickness (liner side):	1.25 mil
Adhesive Thickness (exposed side):	1.45mil
Carrier Thickness (polyester film):	0.5mil
Release Liner Thickness (60# kraft):	3.5mil
Adhesive Color:	Clear Amber
