

Style MM24PG: Fiberglass Fabric Dyed Orange

0.050" Thick Dyed Orange

REVISED: SEPTEMBER 6, 2011

An economical welding blanket or curtain material used to identify areas of a factory where welding or other activities are taking place. It signals that employees should take extra caution. This is a very standard material used for welding protection in power plants as well as petrochemical plants.

Applications include: Curtains, blankets, flue ducts, gaskets, and high-temperature expansion joints

Chemical resistance: Resists more acids, alkalis, and solvents except for hydrofluoric acid and hot phosphoric.

Base Cloth: E-Glass

Weight: 24 oz/sq yd

Weave: Plain

Thickness: 0.050"

Width: 40"

Length: 50 yd

Service Temperature: 1000°F
