

# Style: MM660C-50: VR1200 Fabric

## 0.025" Thick with Polyurethane Coating

**REVISED: SEPTEMBER 6, 2011**

Superior Strength and Abrasion Resistance even at temperature. The coating improves fabric stability and seam strength when cut, punched, or sewn.

Service Temperature: 1200°F

---

Weave: Plain, 2-Ply

---

Construction: 42 x 5 (x2)

---

Thickness: 0.025"

---

Sizing Type: AminoSilane

---

Breaking Strength: Warp - N/25MM >6000; Fill - N/25MM >3000

---

Moisture Content (Fabric) : <0.30

---

LOI, also sizing content: 0.40 - 0.60

---

Combustibility: Pass

---

UV Stability: 6

---

Color Fastness: 6

---

Coating: Polyurethane

---
