

Style SPG650: Maxsil®Tex Silica Tape

0.065" Thick

REVISED: SEPTEMBER 6, 2011

Maxsil Silica Tape is a woven product manufactured from texturized amorphous silica filament fiber. The tape has a continuous service temperature of 2000°F and is strong, flexible and has better abrasion resistance than traditional silica fiber tapes. Excellent for furnace door seals, strip curtains, wrapping of hose, electrical cables, pipes, etc.

Weave: Plain

Thickness: 0.065" (+/- 10%)

Width: 1" – 4" Standard Other widths available upon request (minimums will apply to special widths)

Roll Length: 100 ft

Service Temperature: 2000°F
